REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art searched did not produce any results disclosing, a modular patient care system disclosing, *inter alia*, a plurality of modules, a hinge connector pair, a latch mechanism comprising a first part connected to the first module and a second part connected to the second module, the second part being capable of springably securing to the first part when forced into the first part, means for releasing the second part for the first part, a guide mechanism separate from the hinge connector pair and the latch mechanism and located therebetween, the guide mechanism for discouraging off-axis engagement of the first and second modules and for providing mechanical stability for the first and second modules when engaged; wherein the means for releasing is spaced away from the first portion of the second module a distance sufficient to prevent a hand gripping the first portion from also activating the releasing means.

In relation to the Request to Correct Inventorship dated October 21, 2005, the examiner of record notes for the record that presently the bibliographic data sheet of this application includes Mr. Dale Coleman as one of the inventors. Therefore, it appears that all affairs concerning applicant's request are in order.

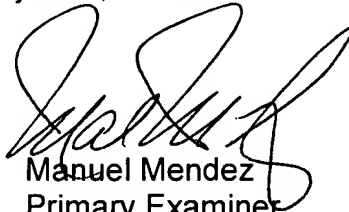

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
